Absa Assessment: Specialist Data Scientist

Take home Power BI/Visualization and presentation challenge **(1 week)**

leverage data from https://github.com/JeffSackmann/tennis_wta to put together a single page Power BI dashboard view illustrating the rankings trajectory of the tennis player that you see the biggest potential in, versus their key competitors, and then use the detailed match data to put together a 3 page storyline presentation, profiling the type of matches or opponents that your highest potential player is still facing challenges against, to test

a. Sourcing & compiling relevant data

b. Power BI data structure and visualizations

c. Leverage relevant trustworthy data points to get your message across

d. Storytelling

e. Engaging audience around topic
